SNAPCAB

Discover design freedom  
with unmatched  
pod customization.

SINCE 1983

COMPANY

# Our People-Centered Design Philosophy

At SnapCab, our design philosophy is rooted in a rich heritage of craftsmanship and a deep respect for humanity. We put people at the heart of every design we create, and strive to address genuine human needs through collaboration with both designers and users. Our ultimate goal is to serve the diverse and inclusive needs of our community.

# Custom Design

We understand that every space is unique, which is why we offer a tailored design experience for our pods.

Seamlessly integrate your pod into any environment with your preferred material, furniture, and tech integration. Explore our extensive material offerings on our “pod design tool” or specify your own. Add custom imagery or branding onto Corning® Gorilla® Glass or vinyl.

Enhance the openness of your pod by selecting rear glass walls, or ensure privacy with the installation of privacy glass.

The possibilities for customization are limitless, allowing you to create a pod that perfectly aligns with your unique requirements and tastes.

Our pods are designed to facilitate easy replacement and updates of interior and exterior wall panels, benches, tables, flooring, and ceiling tiles. These customizable pods are tailored specifically to you and can adapt to your evolving needs.

DESIGN YOUR POD

TAILORED TO FIT

# Custom Pod Sizes for Your Unique Office

Our flexible construction allows for custom pod sizes in width, depth, and height to perfectly accommodate the unique specifications of your space. With this flexibility, you can create an environment that seamlessly integrates with your surroundings and optimizes functionality.

ACOUSTICS

# A Leader in Sound Privacy

As an industry leader in sound privacy solutions, we are proud to offer acoustics that allow for private conversations and focused work. Our pods utilize a significant quantity of sound masking materials to maintain a tranquil interior, shielded from distracting environmental noises. Simultaneously, these materials effectively ensure that conversations within the pod do not disturb the external environment.

According to a University of California study, open office workers experience 50% more interruptions than those in private offices, leading to decreased productivity and increased stress. To support productivity and well-being, it's more important than ever to incorporate effective measures in office design.

CRAFTSMANSHIP

# Crafted Quality

We build our pods with the best materials available, including high-quality heavy-gauge aluminum frames, patented interlocking panels, tempered glass fronts, and double-sealed sound-dampening doors. SnapCab pods are equipped with top-of-the-line, high-load phenolic casters that allow them to easily move and adapt to any floor plan layout. Our products are built to last and designed to stand the test of time.

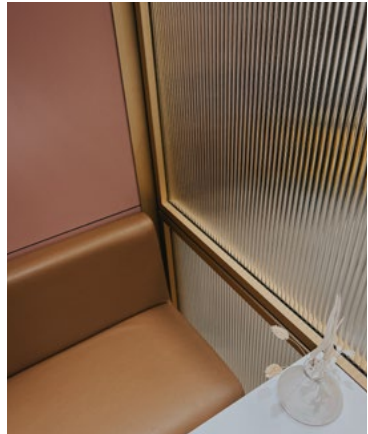

## SUSTAINABILITY

# Future Focused

At SnapCab, sustainability and responsible manufacturing are at the core of our culture. We embrace lean manufacturing principles to reduce waste and create high quality, long-lasting products without planned obsolescence. Our workspace products meet the highest standards for wood products and include significant recycled content.

We partner with vendors who share our commitment to sustainability and value certifications such as LEED and UL Greenguard Gold. Instead of wasteful crating, our products are shipped partially assembled, reducing plastic packaging and fuel emissions in logistics.

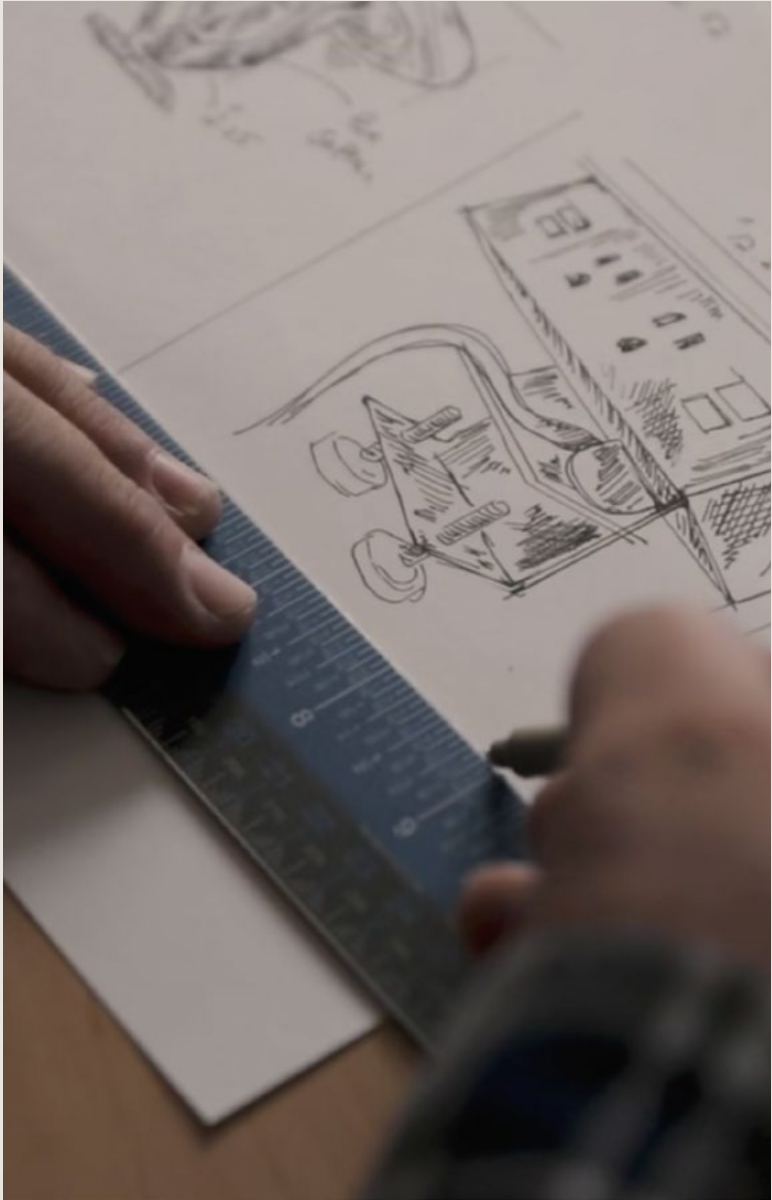

North American Made

# Pod Collections

Design your office space with expertly crafted phone booths, meeting, and office pods designed to last. Experience exceptional sound privacy while tailoring your pod's design for seamless integration into your space.

# Phone Booths

---

Phone booths offer a private and soundproof space for making phone calls or participating in video conferences, without disturbing others in the surrounding area. They are particularly useful in open-plan offices or public spaces where noise levels can be high.

## AWARD WINNING

---

### Focus

Best of NeoCon Silver

2019

# Single

This phone booth is specifically tailored for standing use, allowing individuals to quickly step in, make important phone calls, or complete tasks without the need for a traditional desk or seating arrangement.

**Exterior** 44" w. x 34" d. x 90" h.

**Interior** 39" w. x 31" d. x 78" h.

For a quick project, focused task, or a temporary work arrangement, the Focus offers a secluded and distraction-free setting that enables individuals to accomplish their work effectively and efficiently.

**Exterior** 46" w. x 43.5" d. x 90" h.

**Interior** 40" w. x 37.5" d. x 78" h.

# Focus

# Meeting Pods

---

Meeting pods provide a private, enclosed space for meetings and discussions that require a higher level of privacy than what open-plan offices or shared spaces can offer.

## AWARD WINNING

---

### Meet 2

SIT Furniture	2021
DNA Paris Design	2021
European Product Design	2021
HiP Awards Honoree	2022

# Meet 2

An ideal space for two individuals to meet confidentially, offering maximum privacy without occupying a significant portion of a floor plan.

**Exterior** 77" w. x 35.5" d. x 90" h.

**Interior** 70.5" w. x 30" d. x 78" h.

This meeting pod accommodates up to four people, creating a perfect setting for meetings and focused work.

**Exterior** 77" w. x 53" d. x 90" h.

**Interior** 71" w. x 47" d. x 78" h.

# Meet 4

# Meet 6

An ideal workspace for collaborative sessions, sitting up to 6 people. Its spacious interior comfortably accommodates the entire team, allowing for productive discussions.

**Exterior** 77" w. x 77" d. x 90" h.

**Interior** 71" w. x 71" d. x 78" h.

# Office Pods

---

Office pods offer a private, distraction-free space for focused work and meetings, while also providing flexibility and adaptability in office design and layout.

Experience the difference that comes

with a pod designed specifically for you.

## CASE STUDY

Fractal Workspace incorporated SnapCab pods into their open office to create a flexible and adaptable working environment. They are a favorite among the workplace's clientele.

CASE STUDY

I sat down with Glenn and his team  
and they were amazing to work with.  
We use SnapCab pods in our open office  
spaces and our members love it!

FRACTAL OPEN OFFICE

## CASE STUDY

The SnapCab Work+ has been customized into a mobile exam for a COVID-19 Assessment Centre (AC) where physicians can treat patients requiring additional privacy and comfort: the The SnapCab Care.

The pod, which is a variation of the SnapCab Work+ model, is an enclosed yet ventilated office area with its own HEPA filtration system, a glass front with a sound-blocking glass door, as well as two windows with one-way glass, allowing physicians to see out into the AC and exam area while fully maintaining the privacy of the patients they are treating. The exam area features the SnapCab Connects wall system and is accessible to gurneys. When the entire unit is facing the wall, as it is meant to be used, the exam area provides audio and visual privacy to those inside.

CASE STUDY

This pod has enhanced our ability to provide high quality care to patients presenting to the COVID-19 Assessment Centre, the kids love the design!

KCHC TESTING CENTRE

## CASE STUDY

The SnapCab Nurture includes an opaque glass front, a locking door with occupancy indicator, a coat hook, shelf, hand sanitizer dispenser and mirror. This pod meets federal criteria for workplaces to provide a private space for lactating mothers.

## CASE STUDY

The SnapCab Work+ has been customized to create a private, secure and comfortable lactation pod for mothers in the workplace.

## NURTURE POD

# Warranty

At SnapCab, we stand by our quality. That's why we are pleased to provide you with a 10-year structural warranty for all SnapCab Workspace products.

Damage caused by misuse of products will not be covered under these warranties. The term "misuse" may include, but is not limited to, altering components in any way i.e. drilling holes, installing mounting brackets and hangers, etc., and improper cleaning procedures i.e. using excessively strong cleaners that may damage material finishes.

# Safety

Our pods are UL Listed, seismic certified, fire-rated, CARB Phase II compliant and air quality tested to ensure your safety at all times. We have one of the safest – if not the safest pod products on the market.
